All of the titles added in April are produced by CInet's Fire & Emergency Training Network (FETN). FETN helps to ensure that fire and EMS professionals return safely after every call by keeping their training current on best practices and emerging hazards, while keeping their certifications current and advancing professionally. Developed by some of the nation's top emergency specialists, FETN provides solutions compliant with NFPA, DOT, ISO, OSHA and CECBEMS.

The Ernest A. Emerson Fire Protection Resource Library is proud to be able to lend FETN titles to you and your departments.
