A Volume From the Library

HazMat Tech Continuing Education

The window for completing this year's continuing education (CE) will be closing in six short months. Beyond the minimum CE required for all fire fighters, those who hold HazMat Tech certification are required to get eight hours of technician-level continuing education every year.

This might be difficult if you don't have the time or means to attend a training course. Additionally, training providers have a limited number of training courses specific to HazMat Technician.

As a courtesy, the Emerson library has purchased several DVDs that are eligible for HazMat Tech continuing educa-

tion hours. Each DVD is only about 18 to 30 minutes long, so multiple videos will be required to fulfill one continuing education credit hour. The videos can be borrowed for two to three weeks.

Be sure to have a commission-certified instructor document each video you view, or it will not be counted towards your CE requirements. You will find the form listed under "Additional Resources" on the right. The new DVDs are listed below.

Please remember that there is a 3-item limit on all A/V requests.
